

## Expectations for remote learning

*We have the same expectations of our learners whether learning face to face or remotely. These expectations are expressed through our HARTS campaign.*

### Hardworking

- Be punctual and courteous in attendance at all your lessons
- Listen intently and be prepared to engage in all lessons when appropriate
- Maintain the high standards of behaviour expected in college
- Be well prepared for lessons – read the materials and have at hand the resources you need

### Ambitious

- Make the most of these opportunities by engaging fully in lessons, completing assigned work and maintaining an effective structure to your college work
- Outside of lessons - access specialist support from our Student Support team to aid your positive progression (this could be virtual work experience, remote careers advice or other similar opportunities)

### Resilient

- Attempt all assigned work, seeking feedback where possible and making improvements where needed
- Fully engage in these new opportunities – they may be out of your comfort zone, but a resilient learner will attempt and learn from them
- There are uncertainties over exams, assessments and results. Many of this we can't control, what we can control is the attitude you apply and the effort you put into completing your work

### Thankful & Grateful

- Please consider the challenges teaching and support staff are contending with when teaching, marking and supporting whilst working from home – please share your thanks
- Due to these challenges, we may face some slight delays – please be grateful for staff commitment to ensuring you get the best learning experience

### Self-Aware

- Test your audio and video before a scheduled call
- Make sure you have good lighting so your teacher can see your face clearly; face an open window or put a lamp next to your device
- Join the meeting with your audio muted sign into the chat box to notify of your attendance
- Turn off call tone on your phone and mute all notifications to limit any distraction
