HOW CAN I PREPARE FOR THIS COURSE?

Prior to your return to college please complete the following task and email to Stephanie. Bolton@Hartlepoolfe.ac.uk

Task:

In year 2 more independent research is expected and a large part of this academic year is linked to your professional and personal development within health and social care.

You need to research in depth the specific career pathway you wish to embark on.

Research – skills and qualities required.

What are the long -term opportunities of the career? What are the entry and qualification requirements for university and the career.

Research GIBBS reflective cycle.

From your research you need to produce a reflective piece using GIBBS model that includes your areas of strength and areas for development in relation to the skills and qualities required for that career. It needs to include information of specific universities you will apply to and their individual entry criteria and include 2 SMART goals linked to your development.

Ensure you use Harvard Method of referencing and carefully proof read for spelling, grammar and punctuation prior to submission.
